Mobile Inspections – iPad

Lightweight device, heavy-duty software! Be the envy of Inspectors everywhere with the newest mobile technology. iPad Mobile Inspections has been designed for quick navigation and data entry. It looks and acts just like the HUD-52580 Inspection Checklist form. It has never been easier (or more fun!) to perform HQS Inspections in the field.

One Touch Access
- View list of scheduled inspections
- Create new inspections in the field
- Easy location mapping
- At-a-glance unit and owner data
- Quickly scroll from room-to-room
- Pass an entire room with one-touch
- Built-in list of common repairs
- Clearly indicate pass or fail decision
- Add date for reinspection or repairs
- Add new rooms on-the-fly

Seamless Integration
- Quickly sync data with Housing Pro over Wi-Fi or 3G
- Remotely upload and download inspection data right in the field
- No connection required to operate
- Eliminates double-data entry – no more paper checklists
- Send caseworkers important notifications

Cutting-Edge Technology[1]
- Easy-to-use touch interface
- Built-in virtual keyboard (no pen needed)
- Lightweight
- Low-maintenance
- Significantly less expensive than Tablet PCs

1 Requires iPad 2 hardware. See back for detailed iPad features/specifications. iPad is intended for Mobile Inspections use only. Access to Housing Pro on the iPad is only available using Terminal Services.

iPad 2 Specifications[1]:

- Fast – Dual-core A5 processing chip
- Thin – .34 inches
- Lightweight – 1.3 pounds
- Fingerprint-resistant 9.7 inch LED display
- Available with 16, 32, or 64 GB of storage
- Available with Wi Fi and 3G[2] or Wi-Fi Only – see chart below for details

- 10-hour battery life (subject to usage)
- Front and rear built-in cameras
- Locate lost iPads instantly using free "Find My iPhone"[3] App[4]
- Print wirelessly right from the iPad – visit apple.com for a list of air-print enabled printers

iPad Inspections can be used on a Wi-Fi only iPad. Here are some advantages of also having a 3G connection:	
Function:	**3G Required?**
Remotely upload and download inspection data from the field (not recommended)	Yes
Access to maps/directions in the field	Yes
Access to email in the field	Yes
Send caseworkers notifications from the field	Yes

1 iPad may require connection to a Mac or PC with Internet access to sync with iTunes; USB 2.0 port; Windows 7, Vista, or XP; iTunes 10.5 or later (free download); and an Apple ID
2 3G requires a low-cost cellular service plan (plans start at $15/month)
3 Find My iPhone is a free application that can be downloaded from the Application Store.
4. Use free iCloud software to store and wirelessly push items to all your devices. Find out more at www.apple.com
